

Prompt Templates

This document contains the prompt templates used by the R2RML-ChatGPT Framework, which are designed to streamline the retrieval of useful information related to uplift mappings. **Table 1** outlines the input values which are fed into the templates in **Table 2**.

Table 1: Placeholders used to generate templates

Input Placeholder	Description
<concept_name>	Prefixed identifier of a concept e.g. foaf:name, rdfs:comment, prov:atLocation

Table 1: Prompt templates used by R2RML-ChatGPT Framework

[illegible]
